Outsystems Developer

Are you looking for a new challenge or project?

Where will you work

A technological organization with the responsibility to ensure the correct operation and maintenance of the Portuguese Top-level domain, .pt, is hiring an Outsystems Developer for its office in Lisbon.

Your new role

You will be responsible for the development and maintenance of the systems, based on improvement and innovation, observing trends and business requirements and understanding how they can be used to build and improve strategy.

What you need to be successful

BSc and/or MSc degree in Computer Engineering, Mathematics or other related field with a minimum of 3 years in a similar position.

Experience in Outsystems development and Database Modelling.

Experience in developing "no code" solutions in the OutSystems platform.

Solid knowledge of software engineering principles, algorithms, data structures and OO programming.

Object-oriented programming skills (C# or similar language).

Knowledge in SQL and relational databases such as SQL Server, MySql and others.

Knowledge in NoSql and non-relational database like MongDB is valued.

Knowledge of DNS and DNSSEC is valued.

Knowledge of business - domain name registration is valued.

Knowledge of agile working practices such as SCRUM.

Good level of spoken and written English.

Your new responsibilities

● Development, construction and maintenance of system architectures following OutSystems development best practices;

● Development of complementary information automation systems related between in-house systems;

● Developing integrations with internal and external systems according to the defined architecture guidelines;

.pt

- Carrying out tests and correcting errors, providing preventive measures;
- Providing recommendations for improvement, quality and efficiency of systems and data;
- Using the best development practices in order to keep the system in line with business requirements and strategy;
- Analyze the different system data sources and define collection strategy, generating reliable and relevant information;
- Ensure the extraction of concise statistical data reports and visualizations of clear data for management and teams;
- Identify new opportunities for the improvement of processes.

What we can offer you

Integration in a solid, digital and with growth perspectives organization, focused on the use of innovative technologies.

Initial and continuous training.

Integration in a dynamic and motivated team, with a good working environment and a culture of excellence.

Hybrid system and flexible working hours.

A range of other benefits that exist in the organization.

At .PT it does not matter the nationality, origin, ethnicity, religion, gender or sexual orientation. We focus on the principle of equal opportunities. Everyone is important to achieve organizational success!

If you have these skills, a positive attitude, a focus on problem-solving and presenting solutions, join our team.

We challenge and inspire our people to go further and bring innovative ideas.

We challenge you to be .PT!
